## Onboard and Verify Vendors in NetSuite

Easily onboard and validate vendor data during onboarding in NetSuite with Eftsure's automatic vendor verification requests and real-time validation status updates - all without leaving the platform.

## Real-Time Status Updates

Maintain up-to-date vendor records effortlessly with continuous visibility of the Eftsure supplier status within NetSuite, automatically flagging any status changes.

**eftsure**

## Self-Certification Capability

Enable authorized users to self-certify vendors within NetSuite, increasing control and flexibility in the onboarding process.
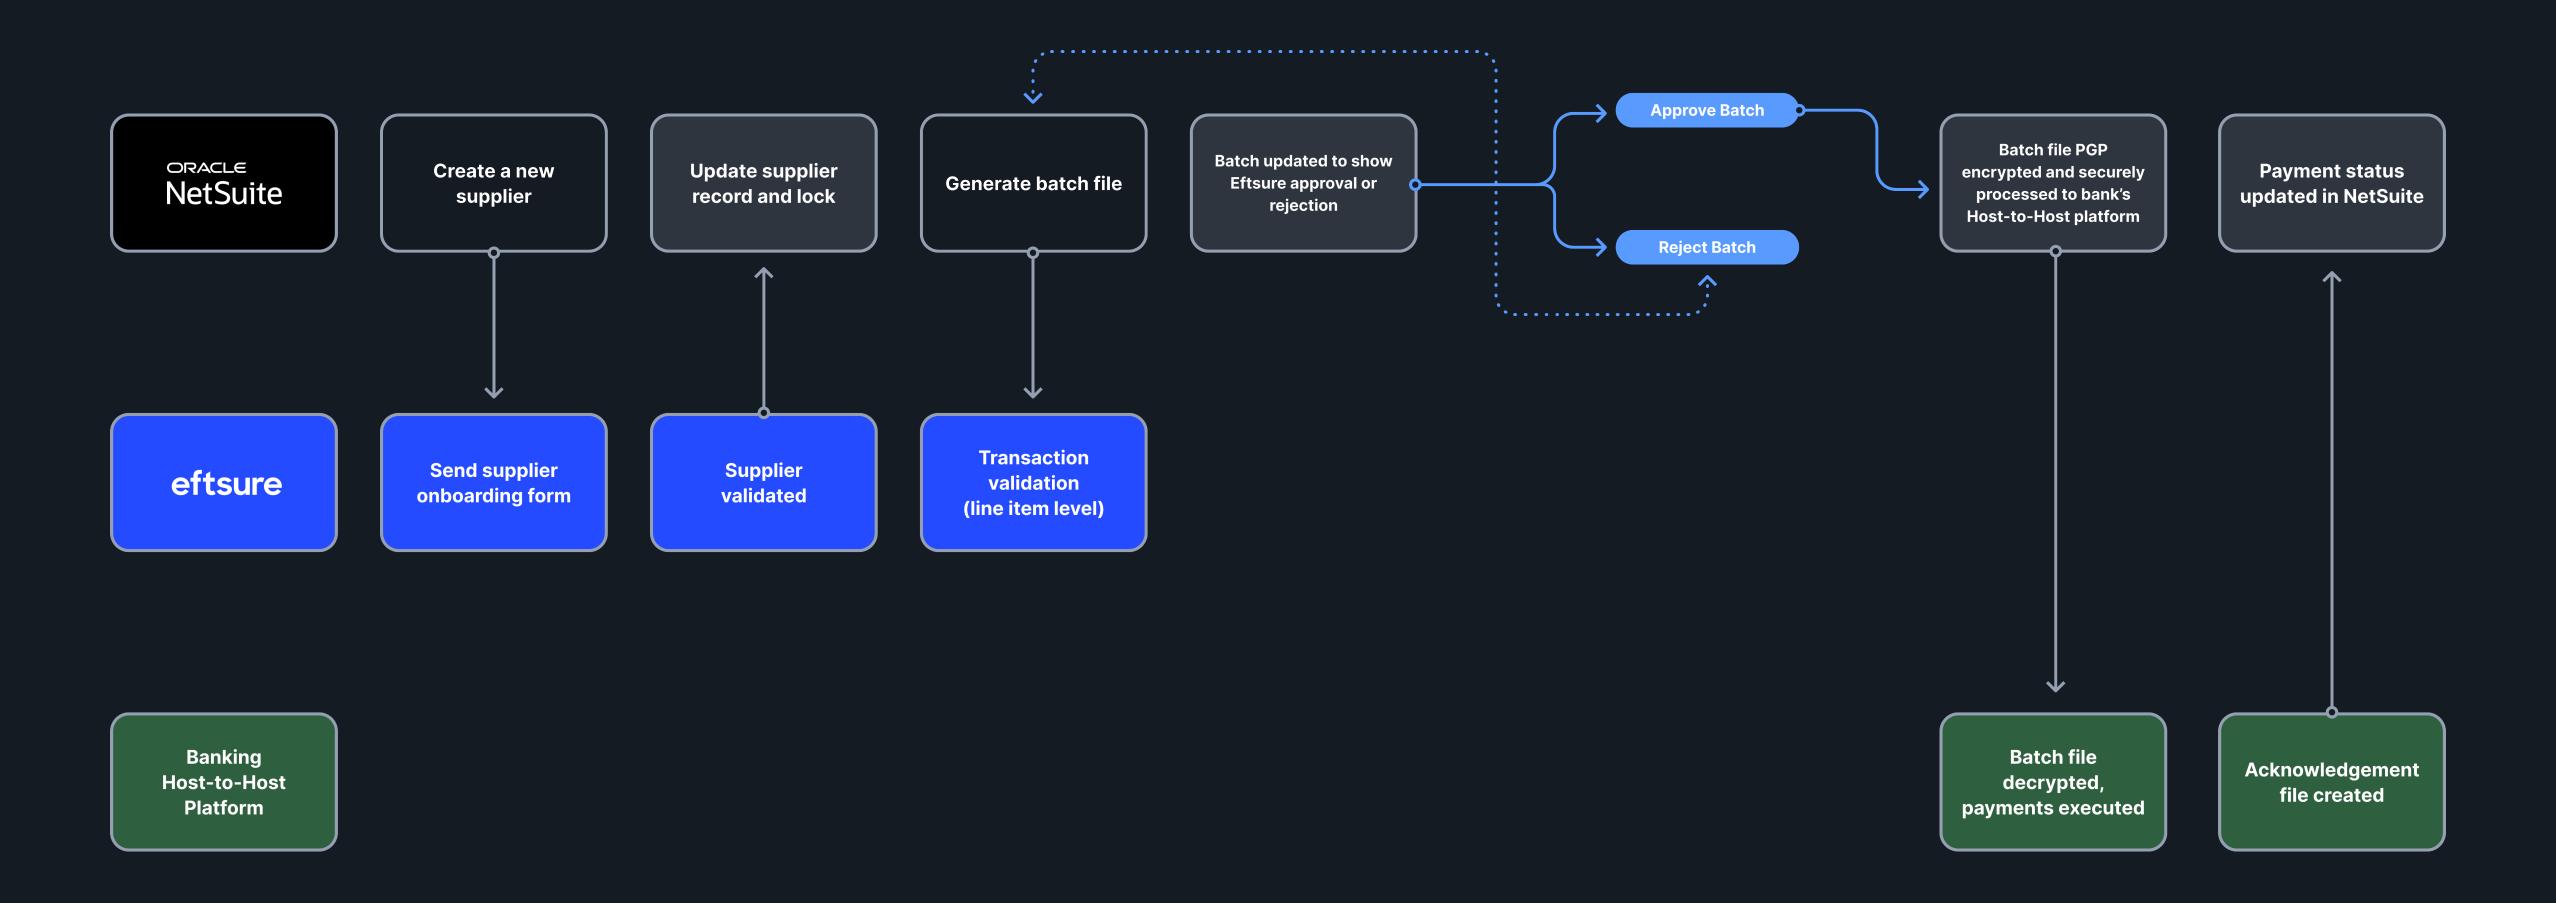

## Secure Payments

Validate payments within NetSuite with clear 'traffic light' visual indicators and set rules to block high-risk transactions—reducing errors and fraud.

## Direct Integration with Banking Platform

Once payment files are validated, straight-through-processing sends the encrypted files directly to your banking platform, securing transactions without leaving NetSuite.

# How it works

**ORACLE NetSuite**

Create a new supplier → Update supplier record and lock → Generate batch file → Batch updated to show Eftsure approval or rejection → Approve Batch / Reject Batch → Batch file PGP encrypted and securely processed to bank's Host-to-Host platform → Payment status updated in NetSuite

**eftsure**

Send supplier onboarding form → Supplier validated → Transaction validation (line item level)

**Banking Host-to-Host Platform**

Batch file decrypted, payments executed → Acknowledgement file created
